该项目应用于制药行业对药品包装的检测,检测项类型分别为:计数检测、三期检测条码读取和外包缺陷检测,使用VisionPro搭载5台相机配合不同光源对各个工位分别检测。采用Visionpro强大的视觉算法做到了同时对不同工位进行快速稳定的运算。且检测率可达到99.4%以上,有效的提高客户产品包装质量,降低了客户的"用户投诉率,并替代人工在一定程度上节省了客户生产过程中的人员成本。

Beijing CVE is a national high-tech enterprise include in integrating machine vision assessment, researching and development, integration and service. With the mission of "creating the future with intelligence", CVE is trying to becoming an international level intelligent manufacturing supplier. The company has a number of machine vision related inventions, patent technology, software and proprietary trademarks and other intellectual property rights, which are on the leading level of machine vision applications in China. In order to supply best service, we set up several branches in Dalian, Shenyang, Qingdao, Yantai, Chongqing and suzhou.

CVE provides professional machine vision (COGNEX) and (UR) robot system solutions services which include machine vision solution design, vision software development (including 3D vision), industrial robots and integration, non-standard automation equipment and production line, etc.

CVE has extensive cooperation with many research institutions and universities on customized machine vision solution with Deep Learning. Main customers cover the automotive, electronics, logistics, medical, food and beverage, railway equipment manufacturing and other industries. Especially the automotive and logistics area have rich experience and completed projects.
